

Greening the CPPR

**Meeting the Challenge of Climate Change
While Delivering National Conferences**

Workgroup Discussion Questions

- What options are there for reducing the ecological footprint of air travel?
- What role can information technology play in facilitating aspects of the CPPR?
- What other opportunities are there for enhancing the CPPR's Greening Practices?

Reducing the Ecological Footprint of Air Travel

- A calculation will be made for each participant (i.e. travel emissions). Based on this calculation, each participant will have the opportunity to make a donation to offset their ecological impact
- Alternate forms of transportation
 - Trains, Buses, Lower-emission planes
- Face-to-face for participants within the host region
 - Enhanced registration for the local community
- Alternate forms of participation for those that cannot attend

Role of Information Technology

- Webcasts / Webinars
 - Options for engagement
 - Webcam / Q&A
 - Participants can join in remotely
 - Speakers could present remotely
 - Opportunities to increase participation in CPPR
 - Nationally / Internationally / Business Community

Questions Raised

- Which sessions would be available through Webcasts / Webinars?
 - Plenary / Workshops / International Panels?
- Are participants ‘willing to pay’ more for a ‘greener’ roundtable?
 - Increase # of sponsors / Increase registration fee
